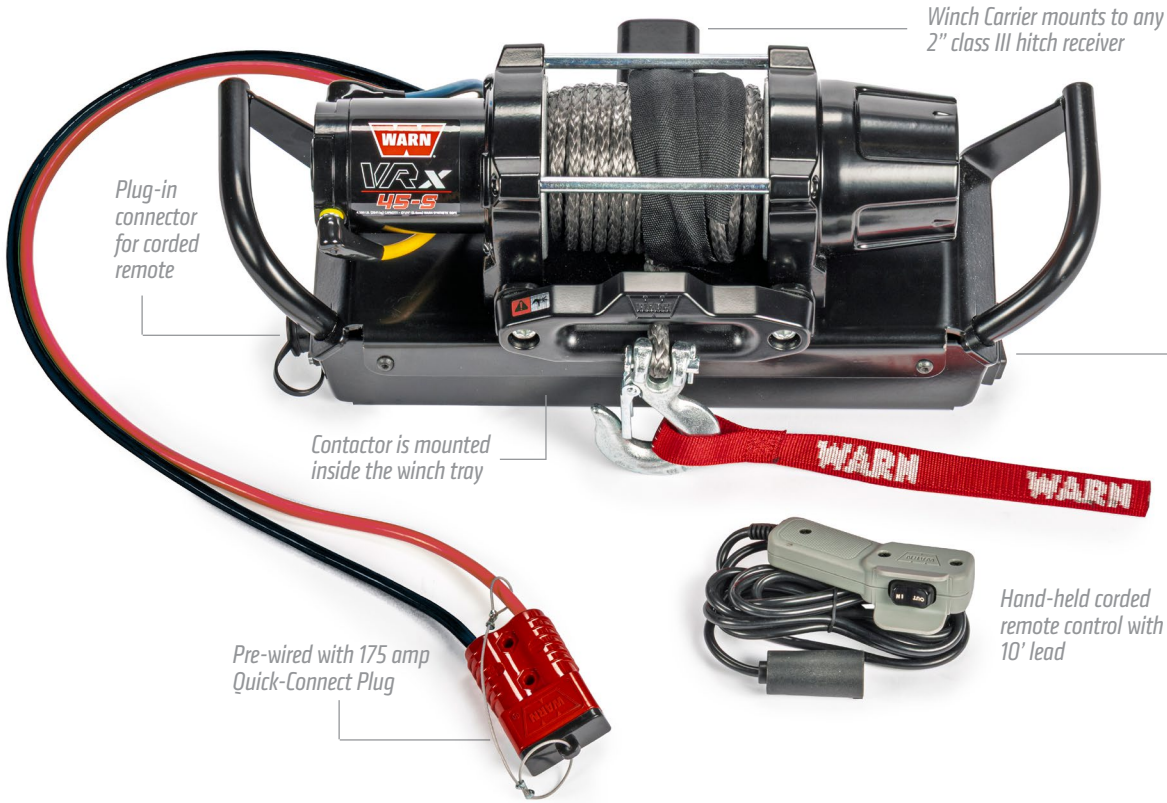
VRX ALL-IN-ONE MULTI-MOUNT KIT



MADE IN USA

ALL THE BENEFITS OF A MULTI-MOUNT, BUT NOW PRE-WIRED FOR FASTER, SIMPLER INSTALLATION

The new VRX All-In-One Multi-Mount Kit is pre-wired out of the box and gets rid of complex wiring and setup. Just bolt the included VRX 35-S or VRX-45-S winch to the pre-wired electrical tray, and connect the appropriate wiring, and you're ready to winch to any vehicle equipped with Quick-Connect wiring (sold separately). There's no fussing with wires, no need to find a place for the winch's contactor—it's all in the mount's tray. You get the ability to move the winch from the front to the rear of your ATV/UTV or even install it on other vehicles.

The new VRX All-In-One Multi-Mount Kit is designed, engineered, and made in the USA and will work with any 2" class III hitch receiver. A rocker switch and corded remote are included, and the wiring is already in the tray and ready to work.

KEY FEATURES:

- **PORTABLE:** *Lets you move your winch between the front and rear of your ATV/UTV or even between vehicles*
- **PRE-WIRED OUT OF THE BOX:** *No complex wiring or setup required. Simply bolt the winch and the pre-wired electrical tray to the mounting plate and the winch is ready to use*
- **VERSATILE CONTROLS:** *Operate the winch with a lighted rocker switch or corded remote control via a plug-in connector. Both are included, and pre-installed right on the multi-mount carrier*
- **CAPACITY AND COMPATIBILITY:** *Choose from a 3,500 lb or 4,500 lb capacity VRX winch, which include synthetic rope, hawse fairlead, and a forged hook. Fits any 2" class III hitch receiver*
- **AMERICAN QUALITY:** *Designed and manufactured in the USA*
