KEVLAR COOLANT LINE WITH HEAVY DUTY METAL FITTING

11537567849PRM | URO-015503 | 2007–2012 Mini

OEM DESIGN FAULT

Plastic fittings in coolant hose assemblies are prone to weakening and catastrophic failure after exposure to heat cycling. Rubber hoses eventually soften and rupture after exposure to oil or grease, resulting in dangerous overheating.

ÜRO PREMIUM SOLUTION

URO has developed Premium hoses equipped with Kevlar reinforcement, improved heat shielding, and aluminum fittings, which are impervious to heat and motor oil. The upgraded materials fix the problem right the first time, for a truly robust repair.
