WIX FILTERS

ENGINEERED FOR *EXPERTS*

FLAME RETARDANT **AIR FILTERS**

PROTECTION FOR **HEAVY** AND **LIGHT** DUTY ENGINES

Vehicles operating in and around fire prone environments face elevated risk from airborne ignition sources. Hot embers and burning debris drawn into the air intake can cause serious fire damage and costly downtime.

FR Air Filters feature an engineered media that resists ignition and actively self-extinguishes when exposed to hot embers, helping reduce fire risk. The WIX FR Air Filter maximizes dirt holding capacity, extending service life even in harsh environments.

RELIABLE FLAME-RETARDANT PROTECTION

- Flame-retardant media designed to withstand fire-exposed environments
- Special pleating, corrugation and embossing of the media for **low restriction and high dirt holding capacity**
- Added protection for fire-support and emergency response vehicles, such as brush trucks and bulldozers
- Superior filtration with low airflow restriction
- Designed for extreme environments and multiple industries
- Easy installation and maintenance
