NanoPro[®]
HEAVY-DUTY AIR FILTERS

Protect your engine from the smallest contaminants with new **WIX NanoPro®** heavy-duty air filters.

BETTER FROM THE START

Protect your engine from the smallest contaminants with new WIX NanoPro® heavy-duty air filters. Because it's coated in a Nano fiber webbing, NanoPro technology gives our filters a higher initial efficiency than conventional cellulose filters and a final efficiency of up to 99.99%, protecting your engine from start to finish.

LONGER SERVICE INTERVAL

With up to 99.99% final efficiency trapping all fine particulates, WIX NanoPro heavy-duty air filters will deliver higher capacity and longer service life, thus helping to reduce overall operating costs. Plus, WIX NanoPro air filters go to work when you do. Designed to be extremely durable, these filters work in even the most extreme conditions. So whether you're working in torrential rain, blistering heat or freezing cold, our air filters can handle it with less downtime.

SUPERIOR PROTECTION

WIX NanoPro heavy-duty air filters are meant to defend engines that work in the filthiest environments. From harsh construction sites and open pit mines to dusty over the road long hauls and agricultural applications, these filters are designed to keep big motors running, increasing your uptime and reducing your maintenance costs.

EASY TO SPOT

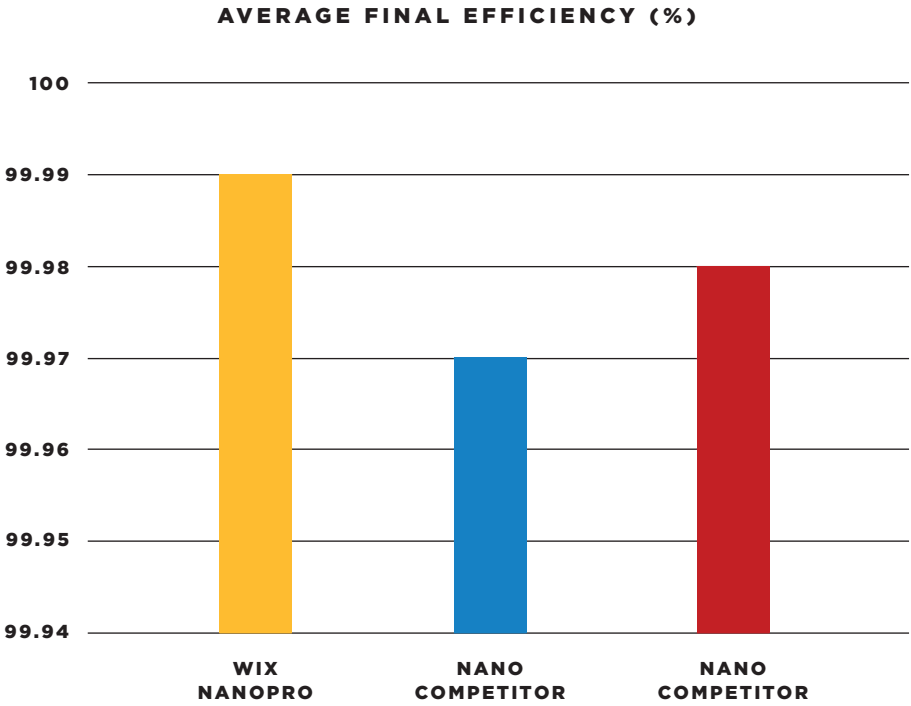

You'll know it's a NanoPro heavy-duty air filter as soon as you see it. NanoPro filters feature a recognizable green color media, so there's no confusion about the protection you're getting.

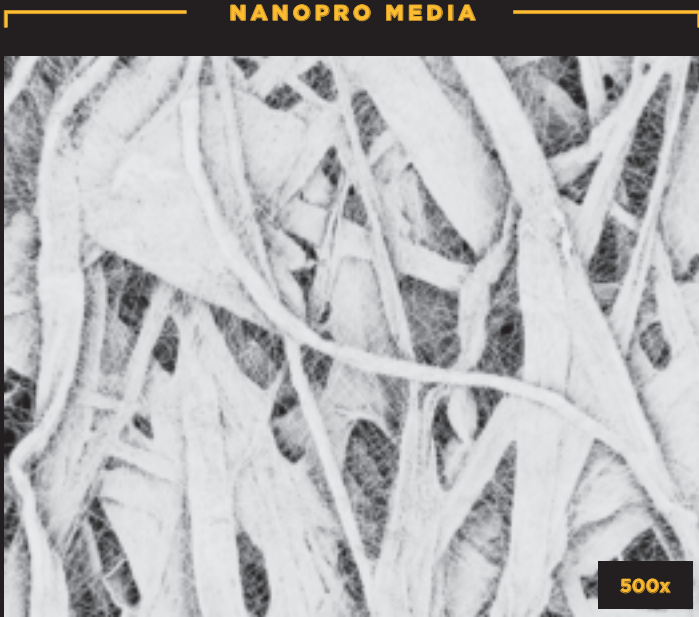

WIX filter part numbers that have NP at the end of the part number are WIX NanoPro heavy-duty air filters. For example, part number 46745NP is the NanoPro air filter for IHC Trucks, John Deere and Hitachi vehicles.

WIX NanoPro® TECHNOLOGY

WIX NanoPro heavy-duty air filters are coated in proprietary Nano fiber webbing that captures even the tiniest contaminants from the start.

This test was performed under the following test conditions: ISO 5011/ J726 Air filter Test, ISO Fine Test Dust. Test Terminate at 30" of water. Flow rates/add rates vary depending on catalog number.

WIX NanoPro heavy-duty air filters feature our proprietary Nano fiber webbing that captures the finest of dust and particulate to provide a longer service life.

Conventional cellulose media without NanoPro.
