

PRODUCT UPDATE BULLETIN

WIX001062226

Customer: All WIX Customers

Date: 06/22/2026

Subject: WIX Premium and XP Oil Filter Construction

The following WIX spin-on filter part numbers have undergone a change in construction. All parts continue to meet the same fit, form, and function requirements.

KEY UPDATES

- The updated baseplate enhances recognition of MANN+HUMMEL filter quality and confirms genuine WIX North American manufacturing
- Riveted spider bypass valve replaces welded button valve, reducing corrosion risk
- Leaf spring replaces coil spring, supporting manufacturing consistency and quality
- Oil filter can heights may be adjusted in select cases to align with standardized catalog sizing
- Clinched baseplate replaces welded attachment, helping minimize potential for corrosion

All WIX products undergo thorough testing and validation to ensure they meet or exceed the company's strict performance standards and original equipment (OE) specifications.
