ÜRO Parts

EPDM COOLANT HOSE WITH HD ALUMINUM FITTING

17127536236PRM | URO-020796 | 2007–2010 BMW

OEM DESIGN FAULT

Plastic fittings in coolant hose assemblies are prone to catastrophic failure after thermal cycles and exposure to oil, grease, or transmission fluid. The embrittled plastic eventually ruptures, resulting in a major leak and dangerous overheating.

ÜRO PREMIUM SOLUTION

URO has developed Premium hoses equipped with aluminum fittings, which are impervious to engine heat, motor oil and ATF. Upgraded EPDM synthetic rubber and sturdy all-metal fitting fixes the problem right the first time, for a truly robust repair.
