Instructions for Updating Assortment

Assortment # HP27 --- Pigtail and Socket Assortment Update Kit

Remove and set aside all of the merchandise and the peghooks on HP5 Pigtail and Socket Assortment. Loosen but do not remove the nuts (2) on the bottom of the same panel. Remove the screws (2) at the top of the same panel and slightly tilt the panel out from the center pole, about 1 1/4 inches. Loosely place one of the screws back into the hole in the panel to temporarily hold it in place. Slide the gray HP5PL planogram out of the display and discard it. Slide the new HP22PL planogram into the panel all the way so that the holes in the planogram line up with the holes in the pegboard. Remove the loose screw and push the panel back in to its original position. Install and tighten the top screws (2) and the bottom nuts (2).

Re-install all of the peghooks and the new merchandise included in this kit. Fill remaining spaces with product from the original assortment. Any remaining product can be sold out, or returned according to your return privileges.

Remove the original application catalog from the chain and replace it with the Laminated Illustrated Guide Card.

This assortment includes:
1- vinyl planogram sheet
1- Laminated Illustrated Guide Card
11- parts
1- Instruction Sheet
