Instructions for Updating Assortment

Assortment # HP29 --- Pigtail and Socket
Update Assortment from one panel to two panels.

Updates Assortment HP5 to HP25.

Remove and set aside all of the merchandise and the peghooks on HP5 Pigtail and Socket Assorttment and from the panel facing it. Loosen but do not remove the nuts (2 each) on the bottom of the same panel(s). Remove the screws (2 each) at the top of the same panel(s) and slightly tilt the panel(s) out from the center pole, about 1 1/4 inches. Loosely place one of the screws back into the hole(s) in the panel(s) to temporarily hold it in place. Slide the gray HP5PL ahd the facing planograms out of the displays. Slide the new HP25PL-1 and HP25PL-2 planograms into the panels all the way so that the holes in the planograms line up with the holes in the pegboard. For best visibility, the planograms should be oriented so that they face each other on two panels, with HP25PL-1 on the left and HP25PL-2 on the right. Remove the loose screws and push the panels back in to their original position. Install and tighten the top screws (2 each) and the bottom nuts (2 each).

Re-install all of the peghooks and the new merchandise included in this kit. Fill remaining spaces with product from the original assortments. Any remaining product can be sold out, or returned according to your return privileges.

Remove the original application catalog from the chain and replace it with the Laminated Illustrated Guide Card.

This assortment includes:
2- vinyl planogram sheets
1- Laminated Illustrated Guide Card
43- parts
43- peghooks
1- Instruction Sheet
