HEAVY-DUTY ALUMINUM SWAY BAR LINK KIT

8K0411317DPRM | URO-010044 | 2008–2015 Audi

OEM DESIGN FAULT

The fragile plastic dogbone and rubber bushings in the OEM front sway bar end link eventually wear out and fail, producing loud clunking over bumps, sloppy turn-in, and degraded handling — a chronic complaint on this chassis.

ÜRO PREMIUM SOLUTION

Constructed using heavy-duty aluminum and high-quality bushings, this URO upgraded front sway bar end link kit delivers crisp, clunk-free handling and a service life many times longer than OEM.
