Made In
CN

Warranty
1 year

Lumens
10,000lm

Beam Pattern
Combo

Product Information

Looking for increased visibility while docking your boat? Wish your boat's deck was illuminated better at night? Marine Sport Lighting's remote-controlled swivel LED search light is the perfect solution for providing a blast of convenient light wear you need it, when you need it. Marine Sport Lighting's RSM50WW marine grade LED search light features a total of 50 watts of High Performance LED diode power, projecting light to distances over 3,000 ft, which means increased visibility during those late-night cruises on the water. This search light has a motorized 360-degree swivel left to right, and it also pivots up and down at 120 degrees. The included RF remote control maneuvers the light from up to a max distance of 320 feet away. Which mean you can conventionally aim the search light, via the remote, to illuminate the water while landing that epic catch! These marine search lights have a durable shatter resistance lens and a sturdy plastic housing, offering extra protection
